Summary

Computer Science undergraduate with strong foundations in **Data Structures, Algorithms, and Object-Oriented Programming**. Experienced in building **full-stack applications and backend systems** using Java and modern web technologies. Proficient in integrating third-party APIs and leveraging AI tools to accelerate development. Enjoy solving real-world problems through clean, scalable solutions.

Education

Bachelor of Engineering (B.E.) in Computer Science Engineering, Chitkara University
CGPA: 9.14

May 2027

Technical Skills

Languages: Java, C++, C, Python, JavaScript

Frontend: HTML, CSS, React.js

Backend: Node.js, Express.js, Spring Boot, REST APIs

Databases: MySQL, MongoDB

AI Tools: ChatGPT, Claude, Gemini, GitHub Copilot (prompt engineering, debugging, code generation)

Core CS: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, DBMS

Other: Linux/Unix (basics), API Integration (REST, third-party services)

Certifications

Nutanix Certified Associate — Multicloud Infrastructure (NCA-MCI)

Validated knowledge of multicloud architecture, virtualization, storage systems, and infrastructure management.

Projects

SafeStreets: Community Safety Platform

- Built a full-stack platform for real-time reporting and tracking of safety incidents using geolocation.
- Designed secure REST APIs with authentication and role-based access control.
- Improved backend performance by optimizing database queries and reducing response time.
- Leveraged AI tools (ChatGPT, Claude) for debugging, optimizing logic, and accelerating development workflow.

CampusGig: Student Freelance Marketplace

- Developed backend services for job posting, user workflows, and transactions.
- Integrated Razorpay payment gateway and enabled real-time communication using WebSockets.
- Improved system reliability through structured error handling and validation pipelines.
- Designed modular backend architecture using object-oriented principles.

Experience

Software Developer Intern - Eazefly / AeroVerve

Feb 2025 - Apr 2025

- Improved API performance by identifying bottlenecks and optimizing request handling.
- Integrated third-party services and ensured smooth frontend-backend communication.
- Strengthened application stability by refining business logic and handling edge cases.
- Websites: eazefly.com, aerovrve.com

Coding Profiles

LeetCode:

- Solved 300+ problems focused on Data Structures and Algorithms.
- Strong understanding of problem-solving patterns like sliding window, hashing, recursion, and dynamic programming.

Leadership & Activities

Design Thinking Society - Graphics Team Member
Prerogative Pointers NGO - Content Lead

Sep 2024 - Oct 2025
Sep 2024 - Present
